

Description

Following the vaccinations given during the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The Vaccination report includes all newly administered vaccines. The report MAY send the immunizations that the EMR imported from the IIS.

This transaction will result in an error or warning from the IIS.

Comments

No Comments

Pre Condition

The vaccines for the visit have been administered.

Post Condition

The IIS has received the vaccine information (Z22 message) and issued a Z23 response with an error or warning.

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's immunization history to public health immunization registries.

Verify that the EMR is able to receive and display the error or warning response from the IIS.

Evaluation Criteria

Evaluation criteria is defined within each test step.
