

### Description

The IIS has a mapping error in their CVX table and is unable to recognize the CVX code sent in RXA-5 even though it is valid. The IIS is unable to identify the appropriate vaccine, which is a required element, and rejects the message. The acknowledgement message returned contains errors for the table mapping, missing required field (RXA-5) and missing required segment (RXA).

### Comments

No Comments

### Pre Condition

A VXU message is generated by the EHR.

### Post Condition

No PostCondition

### Test Objectives

No Test Objectives

### Evaluation Criteria

The errors returned in the ACK message must be visible in the EHR.

### Notes for Testers

No Note

The IIS has a mapping error in their CVX table and is unable to recognize the CVX code sent in RXA-5 even though it is valid. The IIS is unable to identify the appropriate vaccine, which is a required element, and rejects the message. The acknowledgement message returned contains errors for the table mapping, missing required field (RXA-5) and missing required segment (RXA).
