

### Description

As indicated by the vaccine forecast, the first MMRV administered was invalid as it was administered too soon. The provider orders MMRV as a catch-up dose.

### Comments

No Comments

### Pre Condition

Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR.

### Post Condition

MMRV vaccine is ordered for the patient.

### Test Objectives

**Enter Vaccination Order:** The EHR or other clinical software system allows providers to order immunizations for a patient using filters for type of vaccine, including combination vaccines.
