

# Test Story

## Description

A patient is seen at a clinic. A new administration is recorded. The IIS is able to process the administration message but finds multiple soft errors (warnings) which it returns in the acknowledgement message.

## Comments

No Comments

## PreCondition

No PreCondition

## PostCondition

The returned error must be visible in the EHR.

## Test Objectives

This test case assesses the ability of the EHR to accept an acknowledgement message with multiple soft errors being returned by the IIS.

## Evaluation Criteria

No evaluation criteria
