

### Description

The adverse reaction to the MMRV of persistent, inconsolable crying lasting > 3 hours within 48 hours of dose is reported to the Immunization Registry using a Z22/VXU message.

### Comments

No Comments

### Pre Condition

An adverse reaction to the MMRV of persistent, inconsolable crying lasting > 3 hours within 48 hours of dose is recorded in the EMR.

### Post Condition

The adverse reaction has been transmitted to the IIS.

### Test Objectives

***Transmit Standard Patient Immunization History Report:*** The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's immunization history to public health immunization registries.

### Evaluation Criteria

The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22) (context-free). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content.

### Notes for Testers

No Note

The adverse reaction to the MMRV of persistent, inconsolable crying lasting > 3 hours within 48 hours of dose is reported to the Immunization Registry using a Z22/VXU message.
