

Description

The IIS performs a search for Bobbie Q. Child and finds one high-confidence match. The IIS generates an evaluated history and forecast for Bobbie and returns this to the EHR-S. One dose of vaccine was not administrated at the correct age and is marked as not valid. The EHR-S displays the evaluated history and forecast, including the not valid dose.

Comments

No Comments

Pre Condition

The IIS (simulated by the NIST test tool) contains an immunization events for the person.

Post Condition

The response is made available to the EHR-S for processing. The clinician is able to view the evaluated history and forecast from the IIS (even if temporal).

Test Objectives

Receive a response message containing the evaluated history and forecast; display evaluated history and forecast.

Evaluation Criteria

Juror Document
