No Comments

Pre Condition

The IIS (simulated by the NIST test tool) contains an immunization events for the person.

Post Condition

The response is made available to the EHR-S for processing. The clinician is able to view the evaluated history and forecast from the IIS (even if temporal).

Test Objectives

Receive a response message containing the evaluated history and forecast; display evaluated history and forecast.

Demonstrate capability to receive a response file with a number of doses administered, both current and historical. Also demonstrate capability to display a vaccination that is not validated.
