

## Description

This test evaluates the ability of the EHR to gracefully accept a response where too many matches are found, based on the parameters sent in the query. Note that this query only expects an evaluated history and forecast when an exact match is found.

## Comments

The initiating clinician should be alerted to the failure to get an exact match.

## PreCondition

No PreCondition

## PostCondition

No PostCondition

## Test Objectives

The initiating clinician should be alerted to the failure to get an exact match.

## Evaluation Criteria

The EHR receives the response and alerts the clinician that too many matches were found.

## Notes to Testers

No Note
