

Description

The IIS has a mapping error in their CVX table and is unable to recognize the CVX code sent in RXA-5 even though it is valid. The IIS is unable to identify the appropriate vaccine, which is a required element, and rejects the message. The acknowledgement message returned contains errors for the table mapping, missing required field (RXA-5) and missing required segment (RXA).

No Comments

Pre Condition

A VXU message is generated by the EHR.

Post Condition

No PostCondition

Test Objectives

Support to accept an acknowledgement message with a fatal error being returned by the IIS and to display some notification to the end user.

Evaluation Criteria

The errors returned in the ACK message must be visible in the EHR.

Notes for Testers
