DISPLAY VERIFICATION

This Test Case-specific Juror Document provides a checklist for the Tester to use during certification testing for assessing the EHR technology's ability to display required core data elements from the information received in the Evaluated Immunization History and Immunization Forecast Z42 response message. Additional data from the message or from the EHR are permitted to be displayed by the EHR. Grayed-out fields in the Juror Document indicate where no data for the data element indicated were included in the Z42 message for the given Test Case.

The format of this Juror Document is for ease-of-use by the Tester and does not indicate how the EHR display must be designed.

The Evaluated Immunization History and Immunization Forecast data shown in this Juror Document are derived from the Z42 message provided with the given Test Case; equivalent data are permitted to be displayed by the EHR. The column headings are meant to convey the kind of data to be displayed; equivalent labels/column headings are permitted to be displayed by the EHR.

Patient Information			
Element Name	Data	Tester Comment	
Patient Identifier			
ID Number	123456		
Assigning Authority			
Namespace ID	MYEHR		
ID Type	MR		
Patient Identifier			
ID Number	987633		
Assigning Authority			
Namespace ID	MYIIS		
ID Type	SR		
Name	Mariela Gonzales Morales		
Date of Birth	10/01/2015		
Sex	Female		
Address 1			
Street	3321 Standish Way		
Other Designation			
City	Stamford		
State	СТ		
Zip Code	06903		
Country	USA		
Address Type	L		
Address 2			
Street	325 Shorline Drive		
Other Designation			
City	Stamford		
State	СТ		
Zip Code	06901		
Country			
Address Type	BDL		
Mother's Maiden Name	Joanna Elena Gonzales		
When displayed in the EUD with the Evaluated Immunization History and Immunization Foregot			

When displayed in the EHR with the Evaluated Immunization History and Immunization Forecast, these patient demographics data may be derived from either the received immunization message or the EHR patient record. When displaying demographics from the patient record, the EHR must be able to demonstrate a linkage between the demographics in the message (primarily the patient ID in PID-3.1) and the patient record used for display to ensure that the message was associated with the appropriate patient.
