## Description

The IIS has a mapping error in their CVX table and is unable to recognize the CVX code sent in RXA-5 even though it is valid. The IIS is unable to identify the appropriate vaccine, which is a required element, and rejects the message. The acknowledgement message returned contains errors for the table mapping, missing required field (RXA-5) and missing required segment (RXA).

### **Comments**

No Comments

## **Pre Condition**

A VXU message is generated by the EHR.

# **Post Condition**

No PostCondition

# **Test Objectives**

Support to accept an acknowledgement message with a fatal error being returned by the IIS and to display some notification to the end user.

### **Evaluation Criteria**

The errors returned in the ACK message must be visible in the EHR.
