No Comments

Pre Condition

Juana Mariana Gonzales Initial Data Load completed.

Post Condition

Juana Mariana Gonzales is the active working patient in the EMR.

Test Objectives

Select New Patient: The system must allow a user to enter distinguishing information about patients so that providers can uniquely identify patients who have similar sounding names or other similar identifying information. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar names. EHRs or other clinical software must be able to store information to successfully match with patients in immunization registries, if the information is available. The information includes the mother's maiden name, whether the patient was part of a multiple birth, and the order of the multiple birth. This information allows the provider to correctly identify the patient and also helps assure a match when the EHR send the patient's information to external systems such as an immunization registry.

Evaluation Criteria

Tester shall verify that the product can distinguish Juana Mariana Gonzales from similar sounding names using all of the pediatric demographics:

- Patient ID (previously listed as "Medicaid Number") Vendor supplied
- Patient ID: Assigning Authority ID (i.e., owning source)/Facility Name Shoreline Pediatrics
